Period f r Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. Claims 1-41 are pending.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-3, 13-16, 29 and 33, drawn to a method for generating insulin secreting cells by exposing precursor stem cells to a nucleic acid encoding Nuerogenin3, classified in class 514, subclass 44.
- II. Claims 4-6, 17-20, 30 and 34, drawn to drawn to a method for generating insulin secreting cells by exposing precursor stem cells to An activator of Nuerogenin3 expression, classified in class 514, subclass 1.
- III. Claim 7-9, 21-24, 31 and 35, drawn to a method for generating insulin secreting cells by exposing precursor stem cells to a nucleic acid encoding NeuroD/B2 , classified in class 514, subclass 44.
- IV. Claims 10-12, 25-28, 32 and 36, drawn to drawn to a method for generating insulin secreting cells by exposing precursor stem cells to An activator of NeuroD/B2 expression, classified in class 514, subclass 1.
- V. Claim 37 and 39, drawn to a method for identifying an activator of Neugogenin3, classified in class 435, subclass 4.
- VI. Claim 38 and 40, drawn to a method for identifying an activator of NeuroD/B2, classified in class 435, subclass 4.
- VII. Claim 41, drawn to an isolated insulin-secreting cell with certain characteristics, classified in class 435, subclass 325.

Art Unit: 1632

3. Inventions of the groups I-VI are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are drawn to methods that use different components and have distinct steps. For example, the method of group I and III use different genes whereas the methods of groups II and IV use different agents that alter expression of different genes. Similarly, the methods of groups V and VI are screening methods for compounds that activate the expression of different genes.

The composition of group VII is patentably distinct from those of the inventions of groups I-VI because the cells of group VII have specific characteristics which are not present in the cells of groups I-IV and the methods of groups V and VI cannot be used to produce or do not use the cells of group VII.

Because these inventions are distinct for the reasons given above, have acquired a separate status in the art shown by their different classification and/ or their recognized divergent subject matter, and because each invention requires a separate, non-coextensive search, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
